TECHNICAL PROJECTS

Pipeline Pulse — Marketing Data Reconciliation & Data Quality | 2026

- Developed, with AI-assisted implementation, a prototype that imports paid-media and CRM exports and processes them through deterministic validation, normalization, deduplication, reconciliation and KPI calculation.
- Defined data-quality rules, conservative matching behavior, test scenarios, sample datasets and the separation between deterministic calculations and an optional AI explanation layer.
- Silt Strider Tools + Data Pipeline — Structured Data & Internal Tools | 2026
- *Led AI-assisted development of an application and data pipeline that transform legacy game data into normalized SQLite datasets and versioned JSON catalogs; defined data contracts, provenance requirements, integrity checks and regression-test criteria, and reviewed implementation and releases.*

PROFESSIONAL EXPERIENCE
